MONEY, STOCKS AND BONDS.

Dullness and Stagnation Again the Rule in

Wall Street-Small Fluctuations. NEW YORK, July 25.-Money on 'call was easy, ranging from 3 to 312 per cent. the last loan being made at 3 per cent., closing offered at 1 per cent.

Prime mercantile paper 5@612 per cent. Sterling exchange quiet but strong at \$4.85 for sixty-day bills and \$4.8834 for

The total sales of stocks to-day were 100, 597 shares, including the following: Atchison, 9,500; Delaware, Lackawanna & Western, 13,709; St. Paul, 3,010.

The activity and buoyancy shown, to a comparative degree, in the stock market yesterday, and which was directly the result of the expectation that the Secretary of the Treasury would be able to get all the bonds he wanted, disappeared to-day and again the dullness and stagnation, relieved only by a few sudden changes in some of the specialties, prevailed. There were reports that considerable disappointment was felt at Washington that the cir-cular of the Secretary had not brought out a larger number of bonds, but the acceptance of over \$6,000,000 seems to ordinary minds a sufficiently large amount for a beginning, especially as that will release about \$8,000,000. That there was disappointment in Wall street that the market did not respond more fully to such an event. is without doubt, and the fact that it did not is a sufficient proof that the apathy and listlessness of the market at present are deep seated, and it will take time to overthe "bulls" as very favorable to the inauguration of a more active and higher market in the fail, and the fact that stocks do not come out in the dullness gives daily encouragement to the advocates of a higher range of values. The publication of the circular from the treasurer of the sugar combination to-day caused little or no movement in the certificates, and the business done in them showed a marked falling off from that of yesterday. The width of the fluctuations were also on the same limited scale as in the regular list, and the price never got far away from 78. During the day the bearish traders made a few feeble attacks upon certain stocks, and Atchison and Lackawanna were the most conspicuous, but the impression extended to fractions only, and the movement was of short duration in either case. Citisens' Gas, of Brooklyn continued its upward march, the movement being sharp and sudden, like all the movements of the day worthy of mention. The "bears" in New England attempted to offer the stock down, and one of them may find himself in trouble, the last case of the kind having resulted in a suspension for six months. The stock, bowever, closed un-changed from last evening. In Lackawanna they were more successful, and it is the only stock showing any material loss for the day, its decline being 13s per cent. Cit-izens' Gas is up 12 per cent. The close, un-

TRADING AT CHICAGO.

Speculation Active in Grain-Higher Prices

Recorded for Everything CHICAGO, July 25 .- Wheat trading was very active and the market excited within a decidedly higher range of price. The opening was about 18@14c higher than yesterday, and under fair offerings prices declined 4c, then rallied 5gc, or to 92c for September, in which the most interest centers. But from this point prices suddenly advanced 2c, with scarcely any trading, there being but little wheat on sale. This advance was followed by another upturn of 100 34c. At 94c and above there was considerable wheat for sale, and the market settled back 2c, ruled irregular and closed 112c higher for September and 7sc higher for December than the closing figures of yesterday. There was nothing in the way of outside news to cause the sharp advance to-day other than what has already been cited. But the short interest no doubt took fright at the reported large export purchases yesterday, and in an attempt to cover, forced the advance. The bullish feeling that has prevailed in the corn market the past two days again manifested itself to-day, and a still further advance was established, though extreme prices were not maintained. The volume of business was immense, price changes being sharp and frequent, and the market was nervous and unsettled. The cause of the strength was continued bad crop news, the advance in wheat and the active demand for cash property. First trades were a shade above the closing prices of yesterday, with the market active and excited, prices selling up 1@114c, afterwards reacting 100 se, ruled steady, and closed 580 780 better than yesterday. Oats were active, the volume of business showing a decided increase. An unsettled feeling prevailed, and prices covered a range of 15sc, fluctuations being sharp and the average higher. First sales were at 18@14c advance and sold up 11,@15sc for the new crop futures. The bulge was materially assisted by that in wheat and corn. At the advance offerings increased and prices receded 12@11sc, but rallied 14@12c, again became weak and closed easy at 3800 34c over yesterday's close. For mess pork a fair demand prevailed. Prices were advanced 30@75c on all the deliveries excepting September, and the appreciation was fairly well supported. In lard considerable interest was manifested. Prices were advanced .0712@.10c and the appreciation was fairly well supported. An active business was transacted in short-rib sides. Prices were advanced .0212@.05c on the near and .0712 a.10c on the more deferred deliveries. and the improvement was moderately well

DUN & CO.'S WEEKLY REVIEW.

Great Activity and Prosperity in Almost Every Branch of Trade and Industry. NEW YORK, July 25.-R. G. Dun & Co.'s weekly review of trade says: More money and higher prices meet the wishes of most traders, and accordingly the tone of the business world is more satisfied and confident. Meanwhile, silver is accumulating, bu. Shipments-Wheat, 93,200 bu; corn, having risen a cent per ounce by Monday, and since declined 34c, and shipments hither from Russia have become known. Because of speculation in grain and cotton, and higher prices for some manufactured goods, the general average has risen during the week 12 of 1 per cent., and there are indications of a renewal of the speculative fever, which the prospects of monetary expansion produced some time ago. But in other respects the outlook is good, business large for the season, and the great indus-tries are on the whole improving in condition. Latest reports of exchanges through clearing-houses, outside of New York, show

a gain of 15 per cent. over last year. The woolen manufacture shows least improvement of all the great industries. Failure of the Senate to go on with the tariff bill operated as a wet blanket, dealers say. The boot and shoe trade is particularly healthy and active for the season. A most cheering statement is made by the Iron and Steel Association, showing that stocks of pig-iron unsold have increased only 134,000 tons since Jan. 1, though the production in the six months is reckoned by the Iron Age at 4,610,000 tons, which would indicate an increase of nearly half a million tons in the consumption. The market for pig and rails is waiting at former prices, but bar-iroh is firmer, and more demand is seen in structural, plate and bridge-iron. The coal trade is phenomenally dull, and the joutput for July has been restricted to 3,000,000 tons. Copper rises steadily with a growing demand, while tin is 1sc lower and lead quiet. Wheat has been hoisted by great per-

sistency in circulating unfavorable reports of yield at home and abroad. But exports are not large, and the prospect in most of the spring-wheat region is very bright. Prices advanced 23sc for wheat, 212c for corn and Sc for oats on small transactions, Cotton also rose 3/16c on sales of 630,000 bales in spite of highly favorable crop reports. Coffee in steady, and dealers claim that a better distributive demand begins to be felt. Oil is a fraction higher, with small transactions, but hogs and pork products are lower. Raw sugar has been lifted a fraction, in spite of the depression of refined by Spreckles's sales. In general, speculative markets for products show a tendency to advance, mainly because of more money and more speculation.

The state of business at other cities is everywhere as favorable and at some more

favorable than a week ago. Boston notes a

trade steadily exceeding last year's, with

quiet in some branches, but great activity

existing. Philadelphia finds a better demand for iron products, with difficulty in obtaining prompt deliveries; the tobacco business is fair, and the trade in chemicals, drugs and liquors, though quiet as usual at this season, is in good condition. Chicago enjoys, according to Board of Trade returns, a large increase in all grains and considerable in cured meats and cattle, with dressed beef movement three times last year, and sales of dry goods and clothing larger than a year ago. Wool sceipts are small, and the shoe trade quiet, St. Louis reports a fair volume of trade in nearly all lines and good prospects for the fall. At Kansas City business is better, and at Milwaukee and Detroit fairly maintained for the season, with good prospects. At Pittsburg iron is slightly weaker for a few grades, but manufactured products are in good demand, and the glass trade steady. There is remarkable absence of complaints regarding collections in the reports re-

ceived, and the money markets are nowhere With nearly all conditions thus favoring

ing embarrassment in departments of trade and industry which are likely to be affected by the passage or failure of the tariff bill. Foreign trade is naturally adverse under such circumstances, while exports from New York for three weeks in July show a decrease of 1512 per cent. Compared with last year's, there is an increase of no less

than 33 per cent. in imports here. The business failures occurring throughout the country during the last seven days number 199 failures, as compared with 207 last week. For the corresponding week of last year the figures were 216.

Strong Prices, with Trade Moderately Active,

Covers the Local Market.

INDIANAPOLIS, July 25. Trade in all departments to-day was moderately active, with no fluctuations in values. The dry-goods market is now attracting a good deal of attention, and a brisk, early fall trade is looked for. In speaking of the dry-goods market an Eastern commercial paper says: "The tone of the cotton goods market is firmer. Agents say that they are remarkably sold up for the season on brown and bleached cottons, while at the same time cotton is firmer and advancing. The jobbers also admit that the situation is very firm. They agree that if they are in want of goods, instead of finding them on the market, as in former seasons, they have to wait a longer or a shorter time, according to the state of deliveries from the mills on the goods wanted. To sum the matter up, there is little ques-tion but what the market on cotton goods is to remain firm during the autumn at least, though something of the extent of the cotton crop will have something of an influence on the market. The woollen goods market appears to be in rather better shape. At least the talk is more encouraging. Cassimere manufacturers are having a better trade. Agents are busy showing light-weights, and already quite a trade is noted. Indeed, some mills making what are considered staple cassimeres have secured a good showing of orders already. Worsteds are also in rather better request. Piecedyed worsteds are selling remarkably well." In the produce markets trade is good and would be better were not the dry weather cutting down the receipts of fruits and vegetables. Poultry rules easy. Eggs firm, and butter in good request, if a good arti
